GDPR compliance is an ongoing journey to improve the corporate digitisation

The General Data Protection Regulation (GDPR) that came into effect on 25 May 2018 continues to be an evolving and on-going challenge for most organisations. The headline figure revealed that only half of the EU companies were 'fully compliant' on the enforcement date of 25 May, with roughly a quarter (27%) not fully compliant and the rest (23%) unsure.

Given the potential fines and reputational damage for non-compliance companies cannot afford to neglect the correct GDPR methodology for implementation. The focus on GDPR will remain high on the corporate agenda of all businesses to avoid reputational damage and cause trust issues with the stakeholders.

The post-implementation updated FAS seminar/workshop is for all individuals who are the stakeholders in managing data protection, privacy, IT Governance and IT and Cybersecurity within the organisation. Participants with GDPR awareness who wish to improve the effectiveness of their IT Governance, Data and Compliance strategy, and streamline the GDPR processes will be able to use our methodology to ensure long-term compliance.

The module based one day event provides a comprehensive introduction and the practical understanding of the post-implementation implications and the legal requirements. The structured methodology and the implementation path to ensure EU GDPR compliance, and how GDPR stakeholders can help avoid additional work, loss of reputation resulting from data breaches, and the mandatory cyber resilience, data protection, and cybersecurity issues.

The GDPR essentially creates a new position of the data protection officer in public and many private organisations. Data protection officers will be empowered to independently ensure compliance with the new data protection regime. Even for private organisations not obliged to formally appoint a DPO, there will be a need to develop an experienced and knowledgeable privacy professional to manage compliance and security risks. The GDPR brings many new and stricter requirements challenging the skills of all privacy professionals. DPOs will gain rapid visibility and career opportunities since they are required to report directly to top management. These new roles will be very active in passing the message of controlling privacy risks and monitoring compliance with the requirements (and the benefits) of the new GDPR throughout the organisations.

Be certified after intensive training

- Independent qualification by the EU GDPR Institute
- No jargons: suitable for data protection officers, privacy and security professionals, IT specialists, compliance officers, auditors and consultants

EU GDPR Institute methodology

- Holistic approach: Legal + IT + change management
- Based on real business scenarios, discussion cases and practical experiences
- Provide tools, templates and other giveaways
- Quality learning and networking time

GDPR
GENERAL DATA PROTECTION REGULATION
